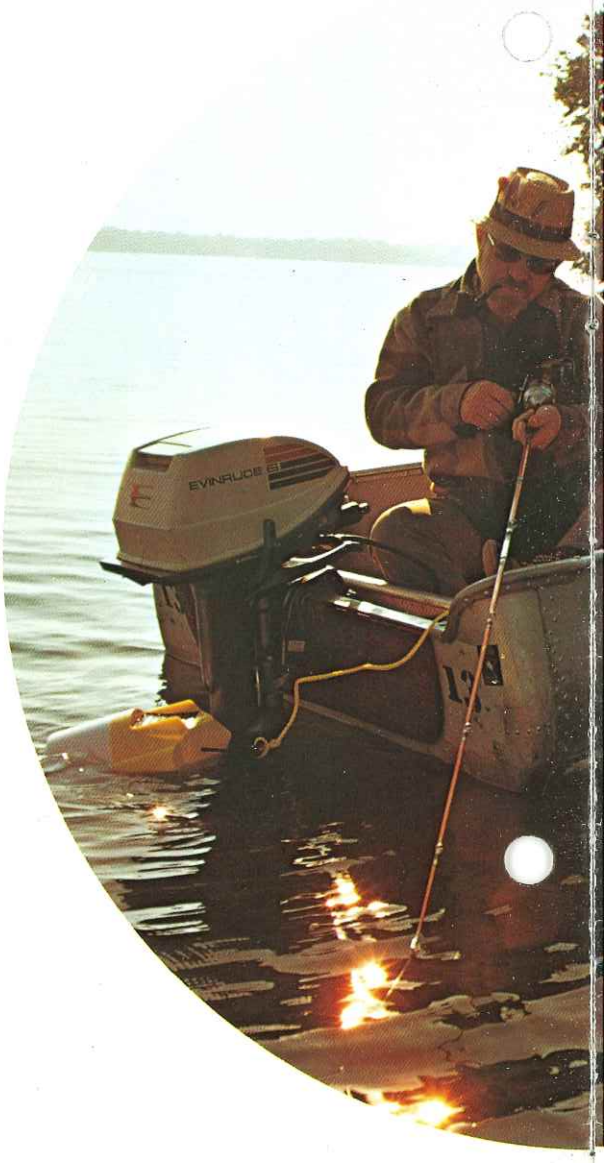
carton; shipping weight 7½ lbs.



FLOW-TROLL* Model 450

It's the accessory no real fisherman wants to be without! Patented Flow-Troll* Bucket keeps any kind of bait alive longer than other buckets do. The unique floating design changes and aerates water automatically. And because it's made of top quality, precision molded polyethylene, it's rustproof, dentproof, noiseless; trolls with minimum drag...always floats with self-closing door up for easy access! In bright yellow and white it also doubles as a floating marker. Holds up to 4 dozen minnows or shrimp. Packed 6 to master carton; shipping wt. 12¾ lbs.

NEW WAY TO SELL!

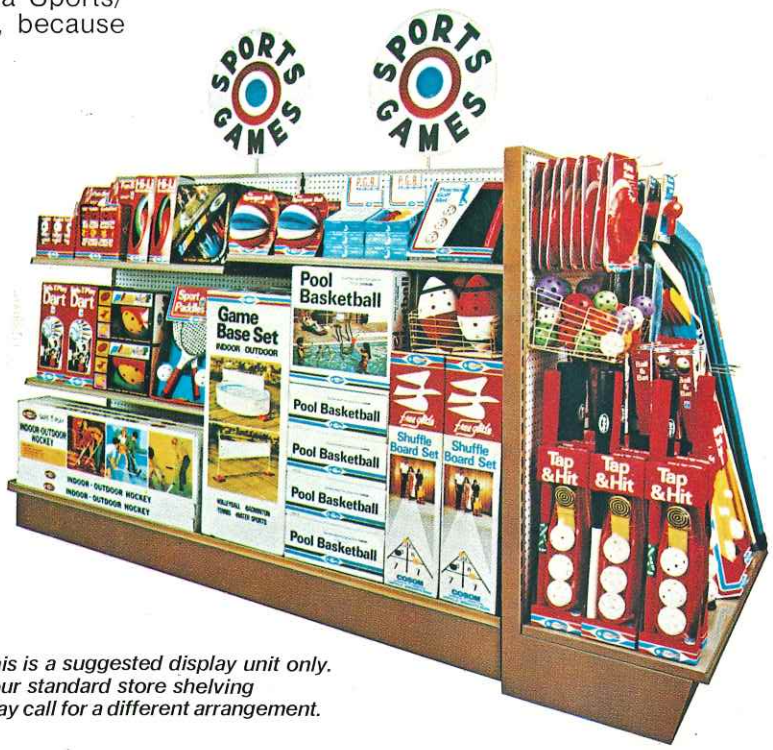
An integrated Sports/Games Section

Until now, these wide appeal items have had a pattern of hit and miss placement in most stores. Some of them have been located in the toy area, some in the sports section.

COSOM has found that when sports and games of this type are displayed together, in a Sports/Games section, sales tend to increase, because customers know where to easily find the items they want. Then the combined display offers the opportunity for the sale of additional items.

Equally important, a single category display acts as a powerful stimulus for impulse buying.

No. 1010



This is a suggested display unit only. Your standard store shelving may call for a different arrangement.
